

Reliant Asset Management Ranked One of America's Top 20 Most Promising Companies by *Forbes*

ARLINGTON, VA, January 29, 2015—Reliant Asset Management, a leading supplier of remote workforce and commercial modular buildings to customers in growing industry sectors, has been ranked number 14 on the Forbes Magazine annual list of America's Most Promising Companies (<http://www.forbes.com/most-promising-companies/list/#tab:rank>).

With specialty expertise in the energy, education, and healthcare sectors, Reliant Asset Management is focused on providing single and multi-story commercial modular buildings for growing businesses and organizations in the U.S. and Canada. Through its subsidiary companies, Reliant offers a wide range of integrated services including customized design, manufacturing, transportation, construction, and financing to name a few.

"We're very pleased to continue to be recognized for our success and growth, and that we were described by Forbes as a company that's 'going places,'" commented Barry Roman, co-founder of Reliant Asset Management. "We have a great team that not only has deep experience in the modular building sector, but is extremely committed to quickly responding to our customers' evolving needs by customizing various modular space solutions."

Headquartered in Arlington, Virginia with offices in Boston, Denver, Houston, Perris (California), Portland, Seattle, Troy (Texas), Trenton, and Edmonton, Canada, Reliant was founded in 2010 by two brothers, Barry and Michael Roman, each of whom has nearly 30 years of experience in the modular building industry. Today, Reliant owns and leases 7,000 modular buildings across 43 states, as well as in Alberta and Ontario, Canada. The company has also experienced rapid revenue growth including an increase of 68% from 2011 through 2014.

"We look forward to building on our strong growth trajectory as we help meet the increasing demand for high quality and cost-effective modular building solutions," said Reliant Asset Management, co-founder Michael Roman. "We strongly believe that modular construction will continue to emerge as an important sustainable alternative to traditional construction, and that we will play an industry leadership role as this trend evolves."

While remote workforce housing (i.e. "crew camps") has helped drive Reliant's growth, expanded use of modular classrooms has also contributed to the company's success as more schools are relying on these buildings as a safe, affordable and flexible solution for fluctuating enrollments. Additionally, Reliant has seen increasing interest from clients in the healthcare sector who have embraced modular buildings as an effective immediate solution for hospital expansions, emergency rooms, rehabilitation facilities, operating rooms, laboratories, and diagnostic centers to name a few.

About Reliant Asset Management

Reliant Asset Management specializes in supplying remote work force and commercial modular buildings for a wide range of industries and applications across the U.S. and Canada. The company is a single source contact and contract for all services necessary to ensure that every aspect of the required structure is met or exceeded. With a seasoned team of modular building experts, Reliant provides a wide range of integrated offerings including customized design, manufacturing, transportation, construction, and financing to name a few. In addition to being named to the Forbes list of America's Top 20 Most Promising Companies, Reliant was also recently ranked number 3 on the 2014 Inc. 500, Inc. Magazine's annual list of the fastest growing private companies in the U.S.
